[LinkedIn : JAGADEESH GADI](#)

Utilized statistical modeling and data mining techniques to extract actionable insights from complex datasets, driving data-driven innovation and business growth.

INTERNSHIP EXPERIENCE

Embedded Systems Intern

MSME TECHNOLOGY CENTRE(V)

Jul 2023 - Aug 2023

- Developed and implemented basic embedded and IoT solutions using Arduino and Raspberry Pi, achieving successful prototypes or deployments.

Java Full Stack Intern

BRAIN O VISION

Aug 2024 - Nov 2024

- Developed and delivered web applications leveraging Java, Spring Boot, React.js, and MySQL, demonstrating expertise in full-stack development and relevant technologies.

Education

GMR INSTITUTE OF TECHNOLOGY

CSE (Computer Science Engineering) | Bachelor of Technology

2022 - 2025

Achieved a CGPA of 8.1, demonstrating consistent academic excellence and ranking in the top of the class.

SMT. B. SEETHA POLYTECHNIC

CME | Diploma

2019 - 2022

Achieved a completion rate of 79.91%.

SRI CHAITANYA EM SCHOOL

10th Grade (SSC)

2018 - 2019

Achieved a GPA of 9.2.

Skills

Hard Skills

C, Java, HTML, CSS, JavaScript, Java Full Stack, Spring Boot, Spring MVC, React.js, MySQL, GitHub, Postman, Arduino boards, Raspberry Pi, Learning Management System (LMS) administration, Training class administration, Report preparation, Delegate list preparation, Post-course evaluations processing, Training materials distribution, Data/Process Compliance, Microsoft Office proficiency, Excel, Email communication

Soft Skills

Professional attitude, Ability to work independently, Initiative, Teamwork, Good listening skills

PROJECTS

LEGAL INFORMATION RETRIEVAL USING NLP

Dec 2024 - Mar 2025

- Engineered a legal document analysis platform combining NLP and graph-based deep learning for efficient case retrieval and summarization. Utilized contextual embeddings (word, sentence, positional) from BERT to extract semantic depth in legal content.
- Implemented Latent Dirichlet Allocation (LDA) for thematic modeling and employed Graph Attention Networks (GAT) to capture topic-sentence associations. This enabled precise case similarity detection and automated legal document summarization, improving both retrieval accuracy and interpretability.

EVENT MANAGEMENT SYSTEM

Aug 2024 - Nov 2024

- Designed a web-based platform leveraging JSP, Spring Framework, and MySQL to optimize event planning and coordination.
- Incorporated distinct user and admin modules supporting event creation, monitoring, and control, with integrated real-time dashboards, automated notifications, and secure payment processing.

ORAL DISEASE CLASSIFICATION USING DENTAL IMAGES: A Hybrid Model

Feb 2024 - May 2024

- Created an intelligent system for oral disease detection through dental imagery, emphasizing early diagnosis and preventive measures.
- Implemented a hybrid model integrating EfficientNet for feature extraction with CBAM (Channel Attention Mechanism) to enhance classification accuracy.

PUBLICATION & ACHIEVEMENTS

Published paper: UAV-Based Object Detection and Tracking – Applications in the Real World ([International Journal of Research Publication and Reviews](#))

Spearheaded the INTERSTELLAR IMPOSTER event during StepCone

Coordinated teams, managed logistics, and achieved successful execution milestones.
