OBJECTIVE

Motivated Computer Science graduate with hands-on experience in Python, Java, APIs, databases, and web development. Strong foundation in data structures, problem-solving, backend development, and software testing, seeking to contribute to HROne's Platform Engineering team.

EDUCATION

GMR INSTITUTE OF TECHNOLOGY

2022 -2025

Bachelor of Technology in CSE (Computer Science Engineering) (CGPA of **8.1**)

SMT. B. SEETHA POLYTECHNIC

2019 -2022

Diploma (CME) (Percentage of **79.91**)

SRI CHAITANYA EM SCHOOL

2018 -2019

10th Grade (SSC) (GPA of **9.2**)

SKILLS

Programming Languages: C, Java, Python, JavaScript.

Web Technologies: HTML, CSS, Java Full Stack.

Web Frameworks: Spring Boot, Spring MVC, React.js, Angular.

Programming Fundamentals: Data Structures and Algorithms,Oops, Debugging

Database Management:MongoDB, MySQL, PHP.

Version Control:Git, GitHub, PostMan Tool

Hardware Platforms: Arduino boards, Raspberry Pi

PROJECTS

LEGAL INFORMATION RETRIEVAL USING NLP

5 Dec - 24 Apr 2025

- Developed a legal document analysis system integrating NLP and graph-based deep learning for case retrieval and summarization. Leveraged contextual embeddings (word, sentence, and positional) from BERT to capture semantic nuances in legal texts.
- Applied Latent Dirichlet Allocation (LDA) for topic modeling and used Graph Attention Networks (GAT) to model topic-sentence relationships. This enabled accurate similar case matching and automated summarization of legal documents, enhancing retrieval precision and interpretability.

EVENT MANAGEMENT SYSTEM

5 Aug - 23 Nov 2024

- Developed a web-based application using JSP, Spring Framework, and MySQL to streamline event planning and management.
- The system features user and admin modules for event creation, tracking, and management, along with real-time dashboards, automated email notifications, and secure payment integration.

ORAL DISEASE CLASSIFICATION USING DENTAL IMAGES: A Hybrid Model

20 Feb - 2 May 2024

- Developed an intelligent machine for oral disease detection using teeth images, focusing on early diagnosis and preventive measure.
- Utilized a Hybrid approach combining Efficient Net for feature extraction and CBAM (Channel Attention Mechanism) for classification enhancement.

INTERNSHIP EXPERIENCE

MSME TECHNOLOGY CENTRE(V)

2 July - 23 Aug 2023

Embedded Systems Intern

- * Efficient usage of Arduino microcontrollers and Raspberry-Pi operating system. Our project showcases developing and implementing various mechanisms with Arduino and Raspberry Pi.

BRAIN O VISION

5 Aug - 23 NOV 2024

Java Full Stack intern

- * Developed and maintained both front-end and back-end components of web applications using Java, Spring Boot, React.js, integrated RESTful APIs, managed databases with MySQL, and utilized Git for version control, scalable applications.

CERTIFICATIONS

AWS Cloud Practitioner Essentials |
Developing Front-End Apps with React |
Foundations of User Experience (UX) Design |
Introduction to Web Development |
Internet Of Things (IOT) |
Java Full Stack

PUBLICATION & ACHIEVEMENTS

- * **UAV- Based Object Detection and Tracking: Real-World Applications published in the International Journal of Research Publication and Reviews**
- * Lead and managed the successful execution of the INTERSTELLAR IMPOSTER Event at the college StepCone event, overseeing team coordination, logistics, and achieving key milestones to ensure its success.
