MyPortfolio : Jagadeesh Gadi

OBJECTIVE

Leveraging analytical and problem-solving skills to uncover actionable insights from complex data, driving data-driven innovation and business growth.

EDUCATION

GMR INSTITUTE OF TECHNOLOGY <i>Bachelor of Technology in CSE (Computer Science Engineering) (CGPA of 8.1)</i>	2022 -2025
SMT. B. SEETHA POLYTECHNIC <i>Diploma (CME) (Percentage of 79.91)</i>	2019 -2022
SRI CHAITANYA EM SCHOOL <i>10th Grade (SSC) (GPA of 9.2)</i>	2018 -2019

SKILLS

Programming Languages: C, Java.
Web Technologies: HTML, CSS, JavaScript, Java Full Stack.
Web Frameworks: Spring Boot, Spring MVC, React.js.
Database Management: MySQL.
Version Control: GitHub, Postman
Hardware Platforms: Arduino boards, Raspberry Pi

PROJECTS

LEGAL INFORMATION RETRIEVAL USING NLP	5 Dec - 24 Mar 2025
- Engineered a legal document analysis platform combining NLP and graph-based deep learning for efficient case retrieval and summarization. Utilized contextual embeddings (word, sentence, positional) from BERT to extract semantic depth in legal content. - Implemented Latent Dirichlet Allocation (LDA) for thematic modeling and employed Graph Attention Networks (GAT) to capture topic-sentence associations. This enabled precise case similarity detection and automated legal document summarization, improving both retrieval accuracy and interpretability.	
EVENT MANAGEMENT SYSTEM	5 Aug - 23 Nov 2024
- Designed a web-based platform leveraging JSP, Spring Framework, and MySQL to optimize event planning and coordination. - Incorporated distinct user and admin modules supporting event creation, monitoring, and control, with integrated real-time dashboards, automated notifications, and secure payment processing.	
ORAL DISEASE CLASSIFICATION USING DENTAL IMAGES: A Hybrid Model	20 Feb - 2 May 2024
- Created an intelligent system for oral disease detection through dental imagery, emphasizing early diagnosis and preventive measures. - Implemented a hybrid model integrating EfficientNet for feature extraction with CBAM (Channel Attention Mechanism) to enhance classification accuracy.	

INTERNSHIP

MSME TECHNOLOGY CENTRE(V) <i>Embedded Systems Intern</i>	July 2023 - Aug 2023
Worked on Arduino and Raspberry Pi for developing basic embedded and IoT solutions.	
BRAIN O VISION <i>Java Full Stack Intern</i>	Aug 2024 - Nov 2024
Developed web applications using Java, Spring Boot, React.js, and MySQL.	

CERTIFICATIONS

AWS Cloud Practitioner Essentials | Developing Front-End Apps with React | Foundations of User Experience (UX) Design |
Introduction to Web Development | Internet of Things (IoT) | Java Full Stack

PUBLICATION & ACHIEVEMENTS

- Published paper: UAV-Based Object Detection and Tracking – Applications in the Real World** (*International Journal of Research Publication and Reviews*)
- Spearheaded the **INTERSTELLAR IMPOSTER** event during StepCone, coordinating teams, managing logistics, and achieving successful execution milestones.
